

HELPING THE ACTIVE STAY ACTIVE

Revolutionary New Treatment for Ingrown Toenails

Introducing Ingrown Toenail Braces:

The toenail is braced with a fine tensioned wire to gently lift the edges of the nail away from the skin allowing the underlying tissues to recover and reducing the curvature of the nail. This method of treating ingrown toenails has been used for over 20 years in Germany and is now available exclusively at the Foot Health Clinic, Samford.

Benefits of the Ingrown Toenail Brace:

- Painless to apply and wear
- Rapid relief from symptoms
- Suitable for children and people with diabetes
- No needles required
- Long lasting relief
- A genuine alternative to surgery for chronic ingrown nails
- No time off work, school or sport
- No footwear restrictions
- Rebates available on private health insurance & Veteran affairs
